Immediate Opening for a JavaScript Software Engineer (MEAN stack)

Wikitude has an immediate opening for a JavaScript Software Engineer (full-time) in Salzburg, Austria, who will work in the Wikitude engineering team and develop consumer-facing web applications. The position will have the added benefit of working with a young, dynamic and highly experienced team in the flexible environment of an emerging startup.

Responsibilities will include all aspects of software development from design to coding and testing.

You have:

- A passion for software development and using cutting edge technologies.
- A Master of Science degree in Computer Science (or equivalent experience).
- Excellent knowledge and experience with JavaScript and web technologies.
- Experience with development using the entire MEAN stack.
- You have an interest to learn how to manage a complex IT Infrastructure based on cloud services.

Answering "Yes" to one or more of the following statements will be considered a plus:

- I have already developed and deployed a full-stack web application using Node.js, Angular.js and NoSQL databases.
- I have already worked with AWS and/or Docker in order to deploy my applications.
- I have already worked in a test-driven development environment and have written proper unit and end-to-end tests for a JavaScript web applications.
- I know how to write performance-optimized, distributable backend applications.
- I have a strong passion for web application development and keep myself updated on the latest and greatest in JavaScript tools and methodologies.

Successful candidates will be highly motivated, self-driven and willing to work on-site in Salzburg to achieve project and company goals. You will have a strong desire to learn new technologies and work on cutting edge technology. Applicants from the European Union are encouraged to apply!
Starting salary is EURO 2,272.00 per month (gross) - 14-times a year, with the potential for higher salary depending on qualifications and experience.

This position is based in Wikitude's HQ office in Salzburg.
